Recommendation Letter

RL · MASTER'S APPLICATION

APPLICATION PROFILE / 学生与申请信息

文书类型	Recommendation Letter / 推荐信	文书代码	RL
学生姓名	李雪 / Li Xue	项目编号	PRJ20260701001
性别 / 年龄	女 / Female · 22	联系电话	138****8888
本科院校	北京大学 / Peking University	本科专业	计算机科学 / Computer Science
本科 GPA	3.8/4.0	语言成绩	IELTS 7.5 · TOEFL 105 · GRE 330
申请院校	卡内基梅隆大学 / CMU	申请专业	人工智能 / MSAII
申请层次	硕士申请 / Master's	申请轮次	ED
文书版本	v1.2	导出日期	2026-08-27
状态	撰写中 / Drafting	编辑信息	张老师 · 2026-07-17 14:32

RECOMMENDATION LETTER

Recommender Details

Name: [To be completed]

Title / Position: [To be completed]

Institution: [To be completed]

Relationship to Applicant: Course Instructor and Project Supervisor

Telephone: [To be completed]

Email: [To be completed]

August 27, 2026

To the Admissions Committee of the M.S. in Artificial Intelligence and Innovation
Carnegie Mellon University

Dear Members of the Admissions Committee,

I am pleased to recommend Li Xue for admission to Carnegie Mellon University's M.S. in Artificial Intelligence and Innovation. I have known Li for two years as her instructor in Machine Learning and as the supervisor of her national undergraduate innovation project. These sustained interactions have allowed me to observe her academic preparation, research potential, reliability, and ability to collaborate with others.

Li has a strong foundation in computer science and learns new material with unusual speed and discipline. In my course, she consistently connected model assumptions with optimization objectives and evaluation methods rather than treating them as isolated formulas. She frequently designed additional experiments to test the limits of a

classroom result. When she encountered an open-ended problem, she did not stop after reproducing a baseline; she examined the error patterns, identified possible causes, and proposed improvements that could be tested objectively.

Her performance in the project “Deep Learning-Based Medical Image Analysis System” further demonstrated her research potential. Li contributed to model design and core experiments concerning image-text alignment under limited annotations. She compared baseline approaches systematically, documented experimental variables, and helped establish a repeatable evaluation process. Her work showed both technical competence and sound judgment: she was careful not to overstate an improvement and could explain why a particular result was or was not meaningful.

Li is also dependable and generous as a team member. She completes assigned work on schedule, communicates problems early, and uses evidence rather than personal preference when discussing alternative solutions. When teammates encountered implementation difficulties, she volunteered to debug code and shared organized notes and experiment records. Her research, internship, and competition experience all reflect a sustained commitment to artificial intelligence rather than a short-term interest.

I recommend Li Xue without reservation. I am confident that she can meet the demands of CMU's graduate curriculum and contribute positively to project teams and the wider academic community. Please feel free to contact me if additional information would be helpful.

Sincerely,

Signature: _____
